

SANDIP SATPUTE

Full Stack Developer (Java | Python | React) — AI/ML & RAG Applications

Pune, India | +91-9022829635 | sandip.satpute0402@gmail.com | github.com/sandip511 | sandip511.github.io/sandipsatpute.dev

SUMMARY

Computer Science Engineering graduate (CGPA 7.7/10) specializing in full stack web development and applied AI/ML. Experienced building REST APIs and production-style web applications with Java, Spring Boot, React.js and Python, and shipping Retrieval-Augmented Generation (RAG) applications using LangChain and OpenAI GPT. Comfortable across the stack: relational and NoSQL databases, Git-based workflows, and end-to-end feature delivery. Seeking an entry-level Software Engineer / Full Stack Developer role.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, JavaScript, SQL
- **Full Stack / Frameworks:** React.js, Node.js, Spring Boot, FastAPI, REST APIs, Next.js
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite | ORM: JPA/Hibernate
- **AI/ML:** LangChain, OpenAI GPT, Retrieval-Augmented Generation (RAG), Pandas, NumPy, Scikit-learn, Matplotlib
- **Tools & Practices:** Git/GitHub, Postman, VS Code, IntelliJ IDEA, Agile/Scrum basics, Unit Testing

EXPERIENCE

Full Stack Developer — College Website Administrator, Amravati, India

Jul 2025 – Jun 2026

HTML, CSS, JavaScript, Bootstrap, WordPress/CMS

- Maintained the official college website end-to-end (structure, design, content) for 1000+ students and staff, keeping information accurate and user-friendly.
- Published exam schedules, results, circulars, and event notices, streamlining communication between administration and students.
- Coordinated with faculty and department heads to collect, verify, and publish accurate content, improving data reliability.
- Performed regular maintenance, content updates, and backups, minimizing downtime and supporting uptime and reliability.

PROJECTS

PDF Document Q&A Chatbot (RAG)

Python, LangChain, Streamlit, OpenAI GPT

- Built a Retrieval-Augmented Generation (RAG) chatbot enabling natural-language Q&A over uploaded PDF documents.
- Designed the retrieval pipeline in LangChain for document chunking, embedding-based retrieval, and prompt orchestration.
- Integrated OpenAI GPT for context-aware response generation with a Streamlit UI for document upload, processing, and conversational interaction, improving retrieval precision.

Car Rental Management System

React.js, Spring Boot, Java, PostgreSQL, REST APIs, HTML, CSS

- Developed a full-stack car rental management system using React.js, Spring Boot, and PostgreSQL, integrating RESTful APIs between the React frontend and Spring Boot backend.
- Implemented user registration/login, car listing with location-based search, and a booking system with date selection, automatic rental cost calculation, and availability management.
- Built booking confirmation, cancellation, and payment functionality, and designed a responsive, user-friendly UI for browsing and booking rental cars.

House Price Prediction System — ML Regression Model

Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Cleaned and preprocessed housing data, handling missing values and engineering features such as location, area, bedrooms, and bathrooms.
- Trained a Scikit-learn regression model to predict housing prices based on the selected features.
- Evaluated model performance using MAE, RMSE, and R^2 metrics, and visualized price distributions and feature relationships with Matplotlib.

EDUCATION

B.E., Computer Science and Engineering — Sant Gadge Baba Amravati University

Jul 2022 – Jun 2026

- CGPA: 7.7/10 | Coursework: Data Structures & Algorithms, Operating Systems, DBMS, AI, Machine Learning, Computer Networks

LEADERSHIP & ACTIVITIES

- Sports Coordinator, Amravati, India (Jan 2024 – Jun 2026) — Led scheduling and logistics for inter-college sports tournaments; managed teams and cross-functional coordination.
